auditor, agrees with the content of the financial statements and the proposal. The Audit Committee proposes to the General Meeting for approval the 2011 Consolidated Financial Statements of Magyar Telekom Group prepared according to the International Financial Reporting Standards (IFRS) as endorsed by the EU, including Balance Sheet Total Assets of HUF 1,098,028 million and Profit for the year of HUF 3,179 million.

Márta Hegedűsné Szűcs: Distinguished Shareholders! PricewaterhouseCoopers has audited the 2011 consolidated annual report of Magyar Telekom Group. As a result of the audit, we have issued an unqualified opinion, which is available in your handouts and a brief summary of which is as follows. During our work we have audited the components and disclosures along with the underlying accounting records and supporting documentation in the consolidated financial statements of Magyar Telekom Nyrt. in accordance with Hungarian Standards on Auditing and, on the basis of our audit work, we have gained sufficient and appropriate evidence that the consolidated financial statements have been prepared in accordance with International Financial Reporting Standards as adopted by the EU. In our opinion, the financial statements give a true fair view of the financial position of Magyar Telekom Nyrt. as of 31 December 2011, and of the results of its operation for the year then ended in accordance with international Financial Reporting Standards as adopted by the EU. Further, the business report is consistent with the disclosures of the consolidated financial statements. Based on all these, we propose the report to the General Meeting for approval. Thank you very much.

Chairman: Thank you very much. I ask the Shareholders whether there are any questions or remarks regarding this agenda item? Please.

Pál Kustra: Pál Kustra, box number 343-2. As it was included in Mr. Mattheisen's presentation this January HUF 21 billion 857 billion was transferred to the SEC and the DoJ. My question is whether with this the U.S. authorities declared that the investigation is finally completed? Back in the spring of 2008, if I remember well, one of the Telekom disclosures contained that the investigation was extended to the then current managers of Telekom, however, I did not see any unambiguous disclosure on the closing of the procedure. If I am right, according to an earlier Telekom disclosure, the DoJ was about to penalize Telekom in one FCPA and in two accounting issues. Which Telekom subsidiary is involved in this FCPA issue: Montenegro or Macedonia? The SEC initiated the procedure against Telekom in, so to say, in two FCPA cases, while the DoJ in only one. Does that mean the U.S. Department of Justice does not know how to investigate or maybe does that mean that Magyar Telekom's managers thought that both SEC cases will stand and why Magyar Telekom's management did not refute that there are no two FCPA cases at the SEC? And my last question: how much did this tiny investigation cost so far and how much will it cost in the future? Thank you.

Chairman: I request Mr. **Máthé** to partly answer this question and Mr. **Kusch** to answer the second part of it.

Balázs Máthé: Yes, I will try. There were many questions. I try to answer them in the order of the questions. Let me note generally at the beginning that naturally and in line with the effective laws Magyar Telekom has shared all information with its shareholders, including Mr. Kustra, regarding the investigation since the beginning of 2006. Nevertheless, we are happy to react on all questions.

The first was: why did we pay so much, if I'm correct, to simplify it, or this much, sorry, yes. Here I can tell you that we already disclosed verbally at general meetings and in writing that naturally Magyar Telekom's Board of Directors, that decided within the scope of its competences, decided in favour of an out of court agreement, and this decision was continuously and logically made on the basis of the opinion of the U.S. legal advisor. The opinion of the U.S. legal advisor was clear that the offer, made as a result of the negotiations with the DoJ and the SEC, represents lower risks and also financially less than a court procedure. I think that this is the simple answer.

The second question, as far as I remember, was that there are differences ... sorry, whether the investigation was finally completed. As we disclosed on December 29 last year, the so called, it is hard to translate it into Hungarian, I

think we translated it as “deferred prosecution agreement” that we concluded with the DoJ. It means that theoretically there is a pending situation for two years. But we practically think that the investigation is naturally closed and this whole case is closed as the obligations in this “deferred prosecution agreement”, the English language abbreviation of which is “DPA”, can be quite clearly fulfilled. We disclosed these, but I repeat them in short. We have to maintain and operate our high standard – as acknowledged by the DoJ and the SEC – compliance system and we have to file a report with the U.S. authorities twice, practically once a year, therefore twice regarding the system. Consequently we must not violate the relevant U.S. laws in the future. These are the two key provisions. We believe that we can comply with these requirements. So our practical answer is that the case is closed.

The third question was that the SEC or the DoJ can not investigate? I think you based this, Mr. Kustra, if I understood your explanation right, on that the disclosed legal standpoint of the DoJ and the SEC were not entirely the same. My brief reaction, I could tell, although it may be too technical for the General Meeting as a forum, is that the DoJ is a criminal authority while the SEC supervises the securities exchange, stock exchange, basically a civil authority. So their approach is different. In a simple way and regarding the essence of the matter the DoJ needs a stronger evidence than the SEC to write down something. I hope that this was the question and the answer is adequate.

The fourth question: maybe I have to ask Mr. **Kusch** to help me: what is the total cost of the investigation up to this date. Obviously the question is aimed to the amount paid above the settlement.

Thilo Kusch: The settlement was obviously nearly 22 billion Forint and the total cost would be 47 billion Forint. So it is basically the settlement, plus a bit more that 25 billion for costs for lawyers and the investigations over the last years the Company paid for.

Chairman: Any comments or questions? If there are none, then... yes?

Pál Kustra: Thank you for the opportunity. Thank you for your answers so far. Unfortunately I asked several questions and I think it was hard to follow. One of these question was whether in spring 2008 there was a Telekom disclosure and it meant that there was also an investigation against the current managers. I did not see any clear refutation on whether this investigation was closed or not? Please answer me with a clear yes or no. As to how the DoJ and the SEC can or can not investigate is another issue. What I was missing and this was also included among my previous questions, i.e. why Telekom did not refuse the SEC allegations when it seems, and is included in Mr. Máthé’s explanation, that one of the FCPA cases is not valid? And regarding these Telekom paid billions to the SEC. Or it would be good if, and I wanted to ask whether further sums will have to be paid for this investigation from the shareholders’ money? Thank you.

Balázs Máthé: So if the first question is rephrased, it goes like why we did not refute what the U.S. authorities alleged? I think that I already answered, but once again, I can tell that I think it is in line with prudent procedures, that the DoJ and the SEC and the U.S. law office retained by Magyar Telekom Nyrt. negotiated, obviously under the auspices of Magyar Telekom Nyrt.’s Board of Directors and naturally their work included to scrutinize the DoJ’s and the SEC’s presented standpoint and to debate the legal standpoint derived from the facts by the DoJ and the SEC. Naturally, this is the general task of any lawyer in a legal action. This took place and Magyar Telekom’s Board of Directors was convinced and regularly made the U.S. legal counsel’s lawyers report, that this work was done. I do not think that we can go into further details here and now.

Regarding the second question: I do not think that I am totally competent in this matter. I am personally absolutely sure that there will be no further payments in this matter. So the so far procedure does not require further payments.

Chairman: Thank you. Any other questions or comments? There is one, we have a question.

György Varkoly: György Varkoly. My box number is 359/4. I was happy to hear that Telekom’s management is satisfied with the lower customer number reduction and churn rate and it expects similar results in 2012 too. I would like to ask in light of the developments in March, and now that we know that the yellow postal cheque will be subject to a transaction tax or a special transaction fee, how will you fit in these requirements? I mean, looking at you advertisement, marketing expenses, Telekom spent approximately HUF 13 billion on building its image and uses bombastic slogans like “professionally as expected from Telekom” “customer oriented” “customized service”. Let me ask how this customized, customer oriented service is represented toward subscribers who have been using the

yellow postal cheque? I would like to tell that very many people stick to the yellow postal cheque because this is the world's most adequate, transparent and fair service and also its settlement. We receive a bill on the service, including how much time we used the phone, how much the service costs and the yellow cheque includes a certificate of payment showing when one paid the bill and the certificate can be attached to the bill. Completed, case closed. Now, you say that based on environment protection reasons Telekom is a progressive, customer friendly company, but this is simply not true as long as you think that the yellow cheque pollutes the environment. Telekom may paint its fliers, stuffed in our letter boxes, green but this is not environment protection. Let me ask why Telekom did not send out its marketing material to shareholders and subscribers electronically? I feel that there is damage to credibility, image here and in a competitive environment this may cost a lot for Telekom. Let me ask it from this perspective whether you plan to revoke this measure, that resulted in almost a public rage, as this annuls all our marketing costs and efforts?

Chairman: Thank you for your question. First, let me emphasize that it should not turn out from my presentation that we are content with loosing customers. This is a relative achievement in the currently harsh economic environment. Let me tell you the following about the yellow cheque. On the one hand, the motive is really environment protection and if we can emphasize for our customers how important it is not to use paper and we can involve electronic tools in more and more functions then on the one hand we protect our environment and on the mid-term and long-term the online payment is more effective and efficient method to communicate to customers. All the advantages that you mentioned, so that the printed document can be tracked, it all applies to a good electronic billing method too. Then a Távszámla, in an electronically traceable system, can and should be tracked the same way. If we can to serve our customers electronically it will open the door in the future that we can more effectively communicate with them then a printed brochure. The printed brochure is in the same envelope as the printed bill. We hope that we can communicate it more effectively and we can pursue our marketing activity more environment friendly to our customers. Any other question or remark? If there is none, I make known:

“The General Meeting approves the 2011 Consolidated Financial Statements of Magyar Telekom Group prepared according to the International Financial Reporting Standards (IFRS), as endorsed by the EU including Balance Sheet Total Assets of HUF 1,098,028 million and Profit for the year 2011 of HUF 3,179 million.”

Chairman: The voting ratio necessary for adopting this resolution is simple majority. I put the proposal to vote.

The result of the voting: the General Meeting has adopted the resolution with 662,501,962 affirmative votes (97.47%), 6,375 negative votes (0.00%), and 17,160,850 abstentions (2.52%), with the number of votes cast indicated by the computer and recorded in the minutes. (Voting ratios in proportion to the registered capital: Affirmative: 63.534567%, Negative: 0.000611%, Abstention: 1.645742%.)

The Audit Committee also reviewed the 2011 annual stand alone financial statements prepared in accordance with requirements of the Accounting Act (abbreviated as HAR) to be submitted to the General Meeting by the Board of Directors, the proposal of the Board of Directors for their acceptance, and listened also to the relevant report of the independent external auditor. The Audit Committee, based on its activities performed during the year and the report of the independent external auditor, agrees with the content of the financial statements and the proposals. The Audit Committee proposes to the General Meeting for approval the Y2011 Annual Report of the Company prepared according to the Hungarian Accounting Regulations, including Balance Sheet Total Assets of HUF 918,414 million and After-tax Net Income of HUF 31,675 million.

Chairman: Thank you very much. I request **Márta Hegedűsné Szűcs**, representative of the Auditor, to verbally outline the essence of the **Auditor's Report** prepared in relation to the Y2011 stand alone Financial Statement.

Márta Hegedűsné Szűcs: Distinguished Shareholders! PricewaterhouseCoopers has audited the 2011 stand alone annual report of the Company in addition to the auditing of the consolidated report of the Magyar Telekom Group and we issued an unqualified opinion, the essence of which is briefly the following. During our work we have audited the components and disclosures along with the underlying accounting records and supporting documentation in the financial statements of Magyar Telekom Nyrt. in accordance with the Hungarian and International Standards on auditing and, on the basis of our audit work, we have gained sufficient and appropriate evidence that the financial statements have been prepared in accordance with the provision of the accounting law and with accounting principles generally accepted. In our opinion, the accompanying financial statements give a true and fair view of the financial position of Magyar Telekom Nyrt. as of 31 December 2011, and of the results of its operations for the year then ended. The business report is consistent with the disclosures in the financial statements. Based on our auditing, we propose the report to the General Meeting for approval. Thank you very much.

Chairman: Thank you very much. I ask the Shareholders whether there are any questions or remarks regarding this agenda item? Are there? Please.

Pál Kustra: Thank you. Pál Kustra, voting box number. 343-2. I would like to ask the auditor, or the gentlemen from the financing area that how was the close to 22 billion amount, paid to the DoJ and to the SEC, accounted for in the Hungarian financial statement? What is the performance behind it as required and allowed by the Accounting and the relevant tax law. Thank you.

Thilo Kusch: Let me take the liberty to give the answer. Obviously this is a penalty, which is based on the agreement of what we had with the U.S. authorities and the way this was booked the 21.9 billion. This has different elements, for example part of the SEC fee there are some interests involved, which is 1.1 billion and has been booked in the net financial expenses. Then the major fine, so to say part, fine 16.2 billion which is booked under other OPEX. And then obviously this penalty was agreed in Dollars, U.S. Dollars, and basically here you also find another aspect of financial

expenses, another 4.6 billion which are related to the change of the currency. And that all ends up to the 21.9 billion Forint. These are, as you are implicitly referred to, these are booked in the 2011 results accounting wise, but they were paid at the beginning of January this year.

Chairman: Any other question or remark? If none, I make known the resolution proposal.

“The General Meeting approves the Y2011 Annual Report of the Company prepared according to the Hungarian Accounting Regulations (HAR), including Balance Sheet Total Assets of HUF 918,414 million and After-tax Net Income of HUF 31,675 million.”

The voting ratio necessary for adopting this resolution is simple majority. I put the proposal to vote.

The result of the voting: the General Meeting has adopted the resolution with 679,655,763 affirmative votes (100.00%), 100 negative votes (0.00%), and 7,039 abstentions (0.00%), with the number of votes cast indicated by the computer and recorded in the minutes. (Voting ratios in proportion to the registered capital: Affirmative: 65.179633%, Negative: 0.000010%, Abstention: 0.000675%.)

Agenda item no. 5

Decision on the approval of the Corporate Governance and Management Report

Chairman: I ask Mr. **Máthé**, to make known the submission and the resolution proposal.

Balázs Máthé: Pursuant to the Companies Act, if the shares of the publicly operating companies are listed on the Budapest Stock Exchange, the Board of Directors must submit the corporate governance and management report to the Annual General Meeting of the company, together with the annual financial statements prepared according to the Accounting Act. The Act also provides that the report can only be submitted to the General Meeting upon its prior approval by the Supervisory Board. The report and its Annex were prepared on the basis of the provisions of the Companies Act and the Corporate Governance Recommendations of the Budapest Stock Exchange (BSE). The Board of Directors submits to the General Meeting the 2011 Corporate Governance and Management Report of Magyar Telekom Plc. in line with the submission.

Agenda item no. 6

Decision on granting relief from liability to the members of the Board of Directors

Chairman: I ask Mr. **Máthé**, to make known the submission and the resolution proposal.

Balázs Máthé: According to the Companies Act, the Articles of Association contain provisions for the general meeting to put on the agenda the evaluation of the work of the executive officers in the previous financial year and to decide on granting relief from liability to the executive officers. According to the Articles of Association and the Companies Act, decision on granting liability relief is within the exclusive authority of the General Meeting. I propose to the General Meeting to adopt the following resolution proposal:

“The General Meeting of Magyar Telekom Plc. - having evaluated the work in the previous financial year of the Board of Directors members of the Company - hereby decides to grant the relief from liability for the members of the Board of Directors of the Company with respect to the 2011 business year in accordance with Section 30 (5) of Act IV of 2006 on Business Associations. By granting this relief, the General Meeting confirms that the members of the Board of Directors have performed their work in 2011 by giving priority to the interests of the Company. The relief from liability granted by this resolution shall be cancelled in the event of a subsequent binding court ruling declaring the information based on which the relief of liability was granted was false or insufficient.”

Chairman: I ask the Shareholders whether there are any questions or remarks regarding this agenda item? If there is none... there is, I see.

Pál Kustra: Pál Kustra box number 343-2. In my first question, in my first comment I asked already that in 2008 you had a disclosure, that you, how shall I put it, extended the scope of the investigation against currently employed officers. When I asked it, I did not receive an answer so I would like to ask the question again whether the year 2008 investigation against current managers has been clearly closed? If it was closed then we can look at the whole thing differently. I don't know, those who sit at the table surely know which investigation I am talking about and what letter was sent by the DoJ in March, 2008 to Magyar Telekom's Board of Directors and the Audit Committee. Thank you.

Balázs Máthé: I take the responsibility as it is indecent to give out internal matters, but still, we have been jointly working on the issue at full power. Which disclosure do you mean Mr. Kustra? We did not find it.

Pál Kustra: You made a disclosure in 2008 where you announced that the scope of the investigation was extended to current officers.

Balázs Máthé: Apologies, it is me who can answer the second one. The investigation was not extended to currently acting officers. This could not happen. However, if you could tell us, name it, the General Meeting might be patient enough to wait for us to interpret the disclosure together. A complete dossier is in front of me and now I can talk about all internal matters, I continuously correspond with my colleagues both electronically and on paper but we did not find any disclosure that you refer to. Would you please quote it, but we do not really understand this.

Pál Kustra: Then I would ask the following, on April 9, 2008 there was an Audit Committee resolution: resolution number 6/1. And based on this you afterwards published the disclosure. Does this resolution exist or not?

Balázs Máthé: As far as I remember, there was an Audit Committee meeting at that time and it obviously made resolutions. But we should identify the disclosure to be able to communicate in a manner that suits the General Meeting. All that I can tell you as a fact is that none of the currently employed members of the management was or is being investigated.

Chairman: Thank you. Please, let me ask **János Illéssy**, Chairman of the Audit Committee, to answer the question.

dr. János Illéssy: Let me specify this, the investigation was Magyar Telekom's own internal investigation. This was not carried out by the DoJ nor the SEC but by Magyar Telekom. Mr. Kustra may mixed it up with the DoJ investigation. The subject matter of the investigation was the activities of the company during these transactions. This was not targeted to persons. Obviously, the entire company was investigated. Maybe Mr. Kustra mistook this. I am not aware of any DoJ investigation against the currently acting management.

Chairman: Thank you. Another question.

Pál Kustra: Pál Kustra box number 343-2. Probably this will be my last question today. So you did not receive the DoJ email dated March 13, 2008? Then this Audit Committee resolution was not made upon that and consequently Magyar Telekom did not make the disclosure that the investigation was extended to the current managers? So you deny that this letter exists, the resolution exists and your disclosure exists?

Chairman: Mr. Illéssy.

dr. János Illéssy: Mr. Kustra, I never denied this and please do not claim that I told things that I never did. As an answer to your question, I did not answer. I also contributed to the discussion upon permission of the Chairman. To my best knowledge there is no DoJ nor SEC investigation against the current management. With this I conclude my brief contribution.

Chairman: Thank you for your answer. Mr. Máthé?

Balázs Máthé: Actually, I only want to say that we think we tried to be constructive, but we do not see how this is connected to the agenda. We already consulted a little here. However, based upon Mr. Kustra's promise that this will be his last question, let me give a last answer, if you allow me. Naturally we can not really give you information about the correspondence, even if it is connected to the agenda item. Once again, the U.S. authorities did not extend any investigation to the members of the current management, such thing did not and does not exist. This is how I can connect your question to the relief, being the subject matter of the agenda item, although we have a three year gap here, but even if we add all our good faith efforts this is all we can tell you. Please accept it. Thank you.

Chairman: Thank you very much. Any other question or remark? If there are none, I inform the Shareholders that the voting ratio necessary for adopting this resolution is simple majority. I put the proposal to vote.

The result of the voting: the General Meeting has adopted the resolution with 679,631,081 affirmative votes (99.99%), 100 negative votes (0.00%), and 5,521 abstentions (0.00%), with the number of votes cast indicated by the computer and recorded in the minutes. (Voting ratios in proportion to the registered capital: Affirmative: 65.177266%, Negative: 0.000010%, Abstention: 0.000529%.)

I state that the General Meeting has adopted the resolution proposal in Resolution No. 9/2012 (IV.16.).

The textual modification proposal, which is part of the submission, can be seen on the screen. Obviously The relevant resolution proposal before the voting:

The General Meeting approves the amendment of Section 2.5.3. of the Articles of Association according to the submission.

3. As a result of and to be consistent with the modification of Section 4.7.1., Section 6.2. (the title of which is: Matters within the Exclusive Scope of Authority of the General Meeting) (a) of the Articles of Association is amended accordingly. We will touch this soon. The textual modification proposal, which is part of the submission, can be seen on the screen. The relevant resolution proposal:

The General Meeting approves the amendment of Section 6.2. (a) of the Articles of Association according to the submission.

4. In accordance with Section 302 c) of the Companies Act Section 6.2. (the title of which is: Matters within the Exclusive Scope of Authority of the General Meeting) of the Articles of Association shall be supplemented with a new subsection (u). This non-mandatory decision only concerns the guidelines and framework for a long term salary and incentive scheme and shall not affect the exclusive competence of the General Meeting pursuant to Section 231 (2) d) of the Companies Act and Section 6.2 (g) of the Articles of Association to make a mandatory decision on the remuneration of the members of the Board of Directors, the Supervisory Board and the Audit Committee to be paid for their position as members. The numbering of the following subsections changes accordingly. The textual modification proposal, which is part of the submission, can be seen on the screen. Obviously, the relevant resolution proposal is as follows:

5. In accordance with Section 18 (3) of the Companies Act, the Articles of Association of the Company may authorize the Board of Directors to change the name, registered office, sites and branch offices and the scope of activities of the Company – except for the main activity - and on the related amendment of the Articles of Association. To ensure the flexible operation of the Company it is proposed that to authorization for the Board of Directors be implemented into the Articles of Association to make decisions on the approval of technical amendments regarding changes to the sites, branch offices and – except for the main activity – the scope of activities of the Company and in relation to this to amend the Articles of Association. 6. The next relates to the Audit Committee. The background of the amendment of the provisions of the Articles of Association regarding the Audit Committee is, on the one hand, the deregistration effective February 12, 2012, of the shares and American Depositary Shares (ADSs) of the Company under the U.S. Securities Exchange Act of 1934, on the other hand, the amendment of the Rules of Procedure of the Audit Committee approved on March 5, 2012. The respective provisions of the Articles of Association shall be harmonized with the effective Rules of Procedure of the Audit Committee, therefore, Section 8.7. (the title of which is: Audit Committee) of the Articles of Association are amended. The textual modification proposals, which are part of the submission, can be seen on the screen in more parts. The resolution proposal is as follows:

The General Meeting approves the amendment of Section 8.7. of the Articles of Association according to the submission.

The textual modification proposal, which is part of the submission, can be seen on the screen. The relevant resolution proposal is as follows:

The General Meeting approves the amendment of Section 10. of the Articles of Association according to the submission.

Chairman: Thank you. I ask the Shareholders whether there are any questions or remarks regarding this agenda item? There is one at the back.

Klára Erdős: Klára Erdős and number 330-0. I have two questions. The first question: the fourth proposal was about a non-mandatory decision on the guidelines and framework for a long term salary and incentive scheme of the members of the Board of Directors, the Supervisory Board and the employees in executive positions, i.e. the Remuneration Guidelines. In connection with this, my question is the following: what does “non-mandatory” means, so the General Meeting decides which is not mandatory to apply? The other: how many years is covered by the long-term? And I would ask the question relating to the other point now. In the fifth point, you say that the Board of Directors requests an authorization to change the activities of the Company, except the main activity. As the main activity in the Articles of Association is “wired telecommunications activities” I would like to ask that what is the operational advantage if the Board of Directors, without the General Meeting, will decide on such amendments? Thank you.

Balázs Máthé: I would answer the technical aspect of the two questions and obviously Mr. Chairman or Mr. Kusch will supplement it if they wish. The first question: what is the non-mandatory guidelines? I think we agree from a linguistic point of view that this is not the best wording, however, we took verbatim the provisions of the Companies Act, namely the text of Section 302 c), which means that is part of, amongst others, as a possibility, for a share based long term remuneration. Obviously, this may be elaborated. I would also quickly respond to the second question. It was that what is the rationale behind that? I don't know whether the question included it, however, it is important to

emphasize that, as it was in the submission and in compliance with the text of the Act that the main activity may not be modified by the Board of Directors within its sphere of competence. It is important to repeat. Other than this...

Chairman: This is from the content point of view. It is supported by that we would like maximum flexibility. This is a tool in our hands. Any other remark or question? If, there are none, I inform the Shareholders that the voting ratio necessary for adopting these resolutions is three-quarters majority. Within this agenda item, please, cast your votes regarding the modifications of the Articles of Association one-by one.

Agenda item no. 8

Amendment of the Remuneration Guidelines

Chairman: I request Mr. Máthé to make known the submission and the resolution proposal.

Balázs Máthé: The Remuneration Guidelines is proposed to be amended due to the following reasons. Structural changes affect the remuneration guidelines of the management. In order to comply with the Corporate Governance Recommendation of the Budapest Stock Exchange, it is recommended that the principles of the share-based incentive schemes are approved by the general meeting. Pursuant to Section 302 c) of the Companies Act and the new Section 6.2. (u) of the Articles of Association, the General Meeting makes a non-mandatory decision concerning the guidelines and framework for a long-term salary and incentive scheme for executive officers, supervisory board members and executive employees (that is Remuneration Guidelines). This non-mandatory decision shall not affect the exclusive competence of the general meeting pursuant to Section 231 (2) d) of the Companies Act and Section 6.2 (g) of the Articles of Association to make a mandatory decision on any remuneration of the members of the Board of Directors, the Supervisory Board and the Audit Committee to be paid for their position as members under the Remuneration Guideline. Based on the above the resolution proposal is the following:

Agenda item no. 9

Authorization of the Board of Directors to purchase ordinary Magyar Telekom shares

Chairman: I ask Mr. **Máthé**, to make known the submission and the resolution proposal.

Balázs Máthé: The Board of Directors proposes to the General Meeting to give an authorization to purchase treasury shares. I make known the resolution proposal:

“The General Meeting authorizes the Board of Directors to purchase a total of up to 104,274,254 ordinary shares (with a face value of HUF 100 each) of Magyar Telekom Plc. The purpose of the authorization is to supplement Magyar Telekom’s current shareholder remuneration policy in line with international practice. The purchased shares might also be used for management remuneration.

The authorization will be valid for 18 months starting from the date of approval of this General Meeting resolution. The shares to be purchased on the basis of this authorization may not at any time account for more than 10% of the share capital (i.e. up to 104,274,254 ordinary shares) of Magyar Telekom Plc.

The shares can be purchased through the stock exchange. The equivalent value per share paid by Magyar Telekom Plc. may not be more than 5% above the market price of the share determined by the opening auction on the trading day at the Budapest Stock Exchange. The minimum value to be paid for one share is HUF 1.

The authorization may be exercised in full or in part, and the purchase can be carried out in partial tranches spread over various purchase dates within the authorization period until the maximum purchase volume has been reached.

Authorization granted to the Board of Directors by Resolution No. 8/2011 (IV.12.) of the General Meeting is hereby repealed.”

Chairman: Thank you very much. I ask the Shareholders whether there are any questions or remarks regarding this agenda item? There is a question.

György Varkoly: My name is György Varkoly and my question relates to the 18 months you are requesting an authorization for: what is the reason for not asking for one year the authorization to buy own shares?

Thilo Kusch: The main reason is a practical one, because not every year the AGM is at the same time, and sometimes even the AGM can be delayed by a few months, and that is why we always say 18 months. But it is basically meant to cover for certain the authorization is there until the next AGM. That is the reason.

dr. Gabriella Bognár: Excuse me, I did not hear the shareholder's name. Could you please repeat for the records? Thank you.

György Varkoly (*answer of the shareholder not told in the microphone*): György Varkoly.

Chairman: Thank you for the remark. Other remark or question? If there are none, I inform the Shareholders that the voting ratio necessary for adopting this resolution is simple majority. I put the proposal to vote.

The result of the voting: the General Meeting has adopted the resolution with 679,450,059 affirmative votes (99.97%), 9,051 negative votes (0.00%), and 2,160 abstentions (0.00%), with the number of votes cast indicated by the computer and recorded in the minutes. (Voting ratios in proportion to the registered capital: Affirmative: 65.159906%, Negative: 0.000868%, Abstention: 0.000207%.)

I state that the General Meeting has adopted the resolution proposal in Resolution No. 18/2012 (IV.16.).
