6. THE PRESENTATION OF THE SYSTEM OF INTERNAL CONTROLS AND THE EVALUATION OF THE ACTIVITY IN THE RELEVANT PERIOD. REPORT ON THE EFFICIENCY AND EFFECTIVENESS OF RISK MANAGEMENT PROCEDURES. (INFORMATION ON WHERE THE REPORT ON INTERNAL CONTROLS BY THE BOARD OF DIRECTORS MAY BE VIEWED BY SHAREHOLDERS.)

The presentation of the system of **internal controls**, evaluation of the activity in the relevant period.

Magyar Telekom's management is committed to establish and maintain an adequate internal control system to ensure the reliability of the financial reports, and minimize operating and compliance risks. Our internal control system is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in conformity with International Financial Reporting Standards (IFRS) as adopted by the European Union.

For the business year 2015 we fully accomplished control documentation and evaluation in the IT supported ICS system. Beside fundamental controls defined by Deutsche Telekom we further operate Transaction Level Controls implemented based on SOX methodology. Transaction Level Controls describe the controls built into our business processes that have been designed and operated to ensure that material misstatements in each significant financial account and disclosure within the financial statements are prevented or detected in a timely manner.

Complete evaluation of our internal control system is based on the method established in "Internal Control—Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The operation of the internal control system is supported also by the independent internal audit function. Beyond tasks regarding the risk based internal audit work plan, contributes to the enhancement of the internal control processes and to the reduction of existing risks through ad-hoc audits. The Internal Audit area follows up the implementation of the measures defined on the basis of the audits. The Supervisory Board and the Audit Committee receive regular reports on the findings of the audits; measures, based on the findings and fulfillment of tasks.

In line with the criteria of the adopted internal control framework, management evaluates the effectiveness of internal control system within each financial year. Management's assessment for 2015 is still in progress, but based on the already available information, we believe that internal control system has been operating effectively to prevent potential material misstatements in the financial statements, and minimize operating and compliance risks.

The Company's shareholders are being informed about the operation of our internal control system through our public reports.

The management and Board of Directors of Magyar Telekom are committed to conduct all business activities of Magyar Telekom Group according to the highest legal and ethical standards. Based on this commitment the Board of Directors established the Corporate compliance program of Magyar Telekom.

The Corporate compliance program is applicable to all bodies, organizations, employees of Magyar Telekom Group, and advisors, agents, representatives as well as to all persons and organizations that work on behalf of the Company or its subsidiary.

The Corporate compliance program of Magyar Telekom ensures that the business activities of the Group are conducted with observing and in compliance with the relevant laws to the outmost extent, according to the highest standards of training and commitment. It requires the realization of guidelines and processes that manage potential compliance risks and implement specific processes in order to report, investigate, monitor and correct suspected or actual lack of compliance.

Risk management policy

It is our policy that all disclosures made by us to our security holders and the investment community be accurate and complete, and fairly present our financial condition and results of operations in all material respects. Such disclosures should be made on a timely basis as required by applicable laws, rules and regulations. To achieve these objectives, we developed and have continuously enhanced our risk management policies.

Our risk management includes identification, assessment and evaluation of risks, development of necessary action plans, as well as monitoring of performance and results. For risk management to be effective, we must ensure that management take business decisions with full understanding of all relevant risks.

In 1999, we established a formal risk management system. This system has been operating in an integrated way with the risk management system of Deutsche Telekom since 2002.

All risks related to material internal and external operations, financial and legal compliance and certain other risks are evaluated and managed by a well-defined internal mechanism. A risk management handbook and an internal regulation on risk management were

issued. A risk management course was developed for employees responsible for risk management in all organizational areas. Risk items affecting our operations are reviewed quarterly throughout the Company. All of our subsidiaries, business units, divisions and entities are obliged to identify and report their operational risks on a quarterly basis. After evaluation of these risks, results are reported to our management, to the Board of Directors and to the Audit Committee.

For the sake of prompt disclosure of all risk items influencing investors' decisions, we enhanced our risk management procedures with a new element, we complemented our quarterly risk reporting system with a continuous reporting procedure which requires all of our departments and subsidiaries to report on a real-time basis any new material fact, information or risk that comes to their knowledge. Information thus submitted is monitored by the risk management area and the CFO is notified when a new material risk or information is identified.

An internal regulation has been issued to define responsibilities of each employee in risk monitoring and management.
