

Join us, be part of the #GenNOW

Data Intern

Being the most dynamically growing ICT company, Magyar Telekom undertakes to diminish the distance between the present and the future. If you like challenges, want to develop and would like to test your capabilities in multiple areas of expertise, seize the opportunity, join our ranks, and let's build the future together! Join our team developing and operating an Enterprise Production Big Data Environment that is unique in Hungary! Work with one of Hungary's largest data asset!

What do we count on you in?

You have the possibility to work in the following roles on an intern level and gain hands on experience:

- Data Engineer tasks:
 - ✓ Build and support data ingestion from any database technology to BigData stack (Cloudera Hadoop) using Python, Sqoop, Kafka / etc
 - ✓ Build and maintain complex jobs on Impala, Spark, etc
- Data Scientist tasks:
 - ✓ Create complex solutions using Machine and Deep Learning algorithms
- Visualization Engineer tasks:
 - ✓ Create dashboards and analytics to enable data driven decision making and work closely with business analysts

You are an ideal intern for us, if:

- You can work at least 20 hours a week in a flexitime arrangement
- You remain to be in an active or passive daytime student status for at least 1 more year
- You study at an academic institution (college, university)

We would be happy to work with you, if:

- You are open to the world of ICT, and can envision your future career here
- You have the ability to multitask
- You are willing to learn and you already have some obtained skills from the following:
 - Database skills (in any DB technology) ideally in Impala
 - Scripting skills in Python
 - Understanding of software development cycle
 - Linux / Shell scripting skills
 - BI visualization skills
 - Statistical and mathematical knowledge
- You have the desire to learn quickly and continuously improve yourself and keep up with the Big Data emerging technologies
- You are characterized by logical thinking and an ability to take the initiative

- You are reliable and diligent
- You possess the required aptitude, ask questions and would like to learn
- You have intermediate-level English and Hungarian language skills

What do we offer you in return?

- You can work at the workplace of the future, in the most exciting industry, on projects that are all about the future
- You can work in an innovative and friendly environment as a member of a closely-knit team
- A mentor helps you develop your expertise and fit in
- You can arrange your working hours flexibly to adapt to your studies
- You can acquire competitive professional expertise, and test your abilities in even multiple areas
- You can gain real work experience with us, supported by a motivating salary structure, a company cell phone and opportunities of professional progress
- You can be part of Telekom's Big Data Journey as a pioneer
- You can gain experience in a truly production enterprise big data environment that is unique in Hungary
