GYAKORNOK

WANTED!

We're looking for You...

- BA degree in Economics (or close to graduation) as minimum;
- Open mindset, flexibility, teamwork;
- Fluent in English;
- You have excellent skills in Microsoft excel;
- Passion for IT would be an advantage.

For these tasks...

The main goal is to support the business growth on financial grounds in teamwork together with the business areas.

In the first 2-3 months firstly learn the basics of a telco business, in which we will guide and train you. Then jump into business analysis and business cases, where we will also support you with all the past experiences from the team members.

- evaluation of existing IT CAPEX demands and IT CAPEX process;
- deep dive into agile budgeting principles;
- support capex management tool selection.

SELECTION PROCESS

In the first round following your application, you will need to complete an online competence test game and a video interview consisting of a few questions.

If you do well at both the game and video interview, you take part in an online AC, still virtually.

If everything goes well, we will see you at Telekom's Budapest HQ building in September.

ARE YOU READY?
