MONITOR - PROTECT - IDENTIFY

# Keep your data secure with the flexibility of scalable perimeter protection

High-level protection that can always be tailored to your company's needs. With Telekom's Managed Perimeter Protection service, you don't have to make any compromises.

## In security incidents, human error is the main cause, often detected too late.

If a cyberattack catches you unprepared, you can face serious consequences.

### Financial loss

Significant revenue can be lost due to business downtime following an attack.

### Legal liability

You can be held personally responsible for the leakage of customer data and trade secrets.

### Reputational damage

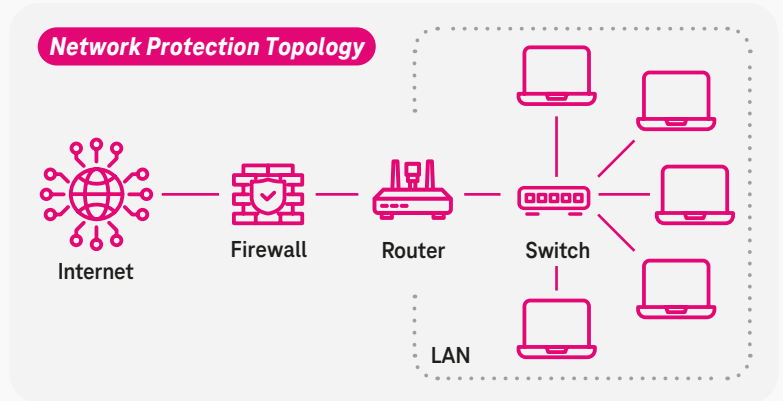

Losing your clients' trust can undo years of hard work in an instant.

**Today, a secure and consistently reliable firewall is no longer optional - it's a basic requirement.**

This is where CTRL Managed Perimeter Protection provides the solution.

## CTRL Managed Perimeter Protection for cost-effective, scalable security.

With our Managed Perimeter Protection service, we shield your company, minimizing the risk of external attacks and supporting continuous business operations. Our cybersecurity experts monitor your data remotely, 24/7.

## In safe hands with one of Europe's leading telecommunications providers

Guaranteeing the security of your company

### Knowledge sharing

**11**

with cybersecurity experts from 11 European countries

### Experience

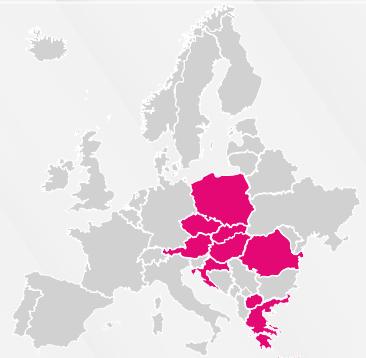

**~30**

years of experience in IT security

# Keep your data secure with the flexibility of scalable perimeter protection

High-level protection that can always be tailored to your company's needs. With Telekom's Managed Perimeter Protection Service, you don't have to make any compromises.

## Customizable protection for effective security

Choose from our basic services, then customize protection according to your needs and budget. With us, you only pay for what you truly need, supporting data security without unnecessary costs.

### Select the basic service that fits your needs!

#### Advanced Threat Protection *For robust network security*

A comprehensive security solution combined with network technology and dedicated engineering hours.

- Intrusion prevention,
  - antivirus protection,
  - continuous reporting, and
  - content filtering
- supports the stability and security of your network.

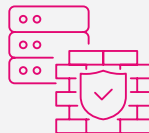

Looking for *even stronger* protection? Then our **UTP package** is designed for you!

#### Unified Threat Protection *For maximum control*

Extends comprehensive ATP protection with:

- category-based web filtering,
- DNS checks, and
- spam filtering

providing full control and security over users' internet activities and emails.

### Boost your protection with additional services!

#### Multi-factor authentication

Extra layer of protection for user authentication

#### OT, SCADA protection

Special "Rugged" devices for industrial environments

#### Fortinet SD-WAN

Uninterrupted business operations with automatic network failover

#### Automated reports

More detailed reports, delivered more frequently

#### Support Plus

Additional engineering hours when extra support is needed

## Not sure which basic service is best for you?

Reach out to our experts, who are happy to assist with any questions! This way, we can determine the necessary level of security while helping you avoid unnecessary expenses.

Our IT security experts are ready to assist you if you need help choosing the right packages.

# Keep your data secure with the flexibility of scalable perimeter protection.

High-level protection that can always be tailored to your company's needs. With Telekom's Managed Perimeter Protection Service, you don't have to make any compromises.

## Four steps toward scalable, flexible security

From assessment to long-term collaboration, we keep your needs and security in focus at every step

## Choose adaptive, always up-to-date protection for any network!

- ✓ **Not just with Telekom networks**  
No matter which provider gives you internet access, our perimeter protection service is compatible with any network.
- ✓ **Outstanding expertise**  
Our Cyber Threat Resilience Team continuously monitors global threats, keeping your protection always up to date.
- ✓ **Intelligent SD-WAN**  
Application-aware traffic management directly in the firewall: maximum bandwidth and stability, without additional devices.

Nearly  
**2 million**  
security risks filtered

## Don't leave the security of your data to chance!

Focus on growing your business while we continuously monitor your IT infrastructure.
